**Make no mistake, collect the complete package.** No other remix site commands the same level of respect amongst musicians, producers and content creators.  
*Steve's Imaginary Sound Space*

ccMixter is a community music site featuring releases licensed under **Creative Commons** where you can listen to, sample, mash-up, or interact with music in whatever way you want.

**Releases** If you're into sampling, remixing or mash ups grab the **sample packs** and **releases** for download and you can upload your version back into ccMixter, for others to enjoy and re-sample. All legal.

**Video makers, podcasters and music lovers** you're into music, browse this site to hear all of the great releases people have built from sampling music on this site, all licensed for use under Creative Commons license.

**As Seen on the Web**  
Video makers, podcasters, open labels and websites have been showing a lot of love to ccMixter releases. They have discovered the new axiom in the music industry that just because it's free doesn't mean you have to sacrifice anything in quality.  
If you use one of our links, make sure to let us know using the "I Saw or Used this" trackbox feature.  
To check out the latest news people have used ccMixter music see our section called:

Apr 18, 2008 :: Help us vote for more audio features in Adobe Flash 10!

Hello, I would normally not do this, but we really need some more audio features in adobe flash. This feature request by **Andre Michalek** over at adobe's "bug" site is all about audio. Imagine perfectly looped freesound previews, perfect in timing. Imagine the power of a small flash sequencer to try out things on the fly!

Mar 20, 2008 :: Freesound: relative sound recording results online

I finally uploaded the results from the 2nd freesound "massive" sound recording. [Click here](#) for the forum post with the links, and some of my favorite sounds.

Mar 17, 2008 :: Adobe, make some noise!

We at Freesound would really like to see more support for audio and sound in adobe flash. It would be so great if we could do some truly awesome things with audio on the web... Adobe make some noise!

Elephants Dream is the world's first open source, made entirely with open source graphics software such as Blender, and with all production files freely available to use however you please, under a Creative Commons license.

The short Project is together in the world.

## Forum opened for feedback / Ten

There's now a new forum on blender.org for discussions on 1 and other Open Projects, as organized by the Blender Projects.

Thanks! -Ten- 2 Responses | Post a Comment

## 'Making Elephants Dream' at Conference / by Matt

It's been a long time since this site was updated, part of the further and further away and on to other new and interesting the studio (unfortunately missing those, who's light was once got back together in Amsterdam again for the Blender confer 'Making Elephants Dream', which is available here on Google mention a few things, including our version of what the story make eggs and tributes that we hid inside, so if you're intena

## First European HD DVD relea Elephants Dream / by Matt

The next generation of DVD formats are on their way, and on supporting HD 1080i video, high quality surround sound interactive features. Today, Michael Decker from @youth Media Germany sent us an email telling us that his company had po HD DVD title: Elephants Dream.

Michael tells us:

I am very happy to let you know that we started very works to produce an "Elephants Dream" HD DVD. T European HD DVD title and it will introduce the star format in Europe. As the whole European PC and we waiting for a first HD DVD title in Europe this will b your movie and I am sure this will go through the pr

Today there are available (USA / Japan) only app. The HD DVD format was released in April this year, the new HD disc format for the future. A European s planned for approx. October 2008. The process to po HD DVD is very complex this is why so little has been far (tools are not ready right now).

Not only that Elephants Dream is the first European also (as far as I know) the most complex HD DVD in available and the picture quality is really great. Th the new HD DVD functionalities such as "on the fly" Picture Selection and some HD / SD conversion fun ctions I have implemented, are cool and ready for

**Ryan Lerch: Issue 1 of 'Code:Free' - an Art Magazine for FOSS artists**  
Mon, 21 Apr 2008 22:28:01 +0000

Chrisdesign has launched a new PDF magazine entitled 'Code:Free' and it is loaded to the brim with awesome examples of artwork created using Free Software. As can be expected, the majority of the art was created with Inkscape and the GIMP, but there are also some nice Open Clip Art remixes thrown in to mix it up a bit. Chrisdesign also writes some tutorials (some of which I have featured on the Inkscape tutorials weblog) so be sure to browse his blog.

Be sure to check it out and support the growing number of artists using FOSS to create stunning works!
